

Inclusive and Nurturing Spaces for Progressive, Innovative, and Responsive Education

The problem. Project's solution

Children with special educational needs face significant barriers in accessing quality education, as many schools are not adapted to their needs.

By creating inclusive outdoor learning spaces, such as therapeutic gardens in Ivano-Frankivsk and Botoșani, environmental education, creativity, and sensory development will be promoted through cross-border cooperation, as well as modern teaching methods, to ensure equal access to inclusive education.
