

Sustainable Training Educational Platform

EDUCATION

STEP

The problem. Project's solution

Rural students in Săcălășeni (RO) and Dubove (UA) face limited access to quality educational infrastructure and learning opportunities.

This project addresses these challenges by creating a modern cross-border educational hub focused on light aviation. Through flight simulators, advanced equipment, and an e-learning platform, over 1,000 pupils and students annually will gain theoretical and practical skills—empowering them to grow, connect, and thrive within their communities and beyond.
