

Cross-border partnership for access to a community-based care system

The problem. Project's solution

The Romanian-Ukrainian border area faces serious healthcare challenges: low life expectancy, underfunded systems, poor access in remote communities, and post-war infrastructure damage in Ukraine. Many residents lack nearby specialized care, especially the elderly and vulnerable groups.

The project addresses these issues by investing in local medical infrastructure, enhancing recovery and dental services, and fostering cross-border cooperation. Through joint actions, health education, and improved access, the initiative aims to strengthen public health systems and deliver better care across all three partner communities.
