

Quality Education Partnership for Rural Schools Across Borders

The problem. Project's solution

Rural students in Romania and Ukraine face deepening educational disparities due to poor infrastructure, limited equipment, teacher skill gaps, and the impacts of the pandemic and war.

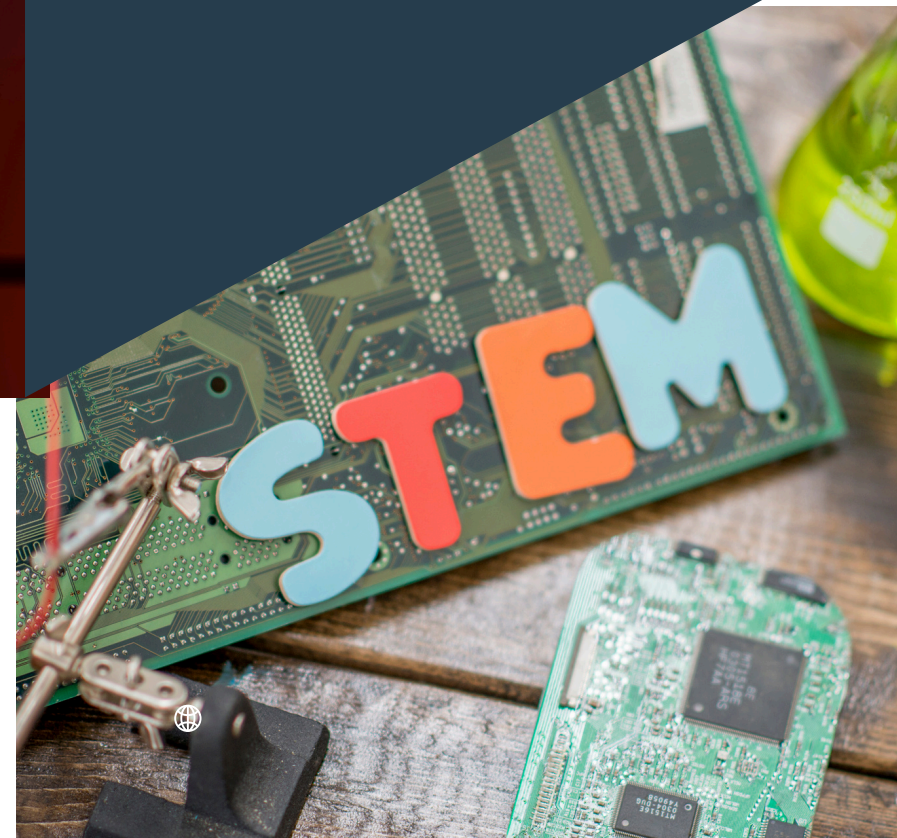

The project addresses these challenges by renovating schools, establishing a STEM lab, training teachers in inclusive and digital methods, and fostering cross-border collaboration. Through improved environments and tailored support, the initiative promotes equal educational opportunities and inclusion for all students in Moftin and Vyshkovo.
